

Special P-D-R Meeting on Biotechnology Information and Intellectual Property

April 15 - 16, 2002 - Frankfurt am Main (Germany)

The biotech and genome revolution are already making a massive impact on pharmaceutical drug discovery and development processes, a vast amount of genomic and proteomic data being now available to research and intellectual property functions.

This special P-D-R Meeting will be dedicated to these topics, discussing trends and issues with leading experts from both inside and outside the industry.

Information/Knowledge Management professionals and bioinformatic specialists from P-D-R member companies will share and discuss best practices of exploiting and manipulating biotechnology information. The Meeting is open solely to P-D-R member companies and special guests.
